RF + Infrared Light + Vacuum + Rolling Massager + Cavitation

The Sculpt PRO Fat-Burning System combines Bipolar Radio Frequency, Infrared Light, Vacuum, Auto-roller Massage and Ultrasonic Cavitation.

The treatment utilises a technology that combines controllable suction with electric heating.

It is an easy, downtime-free, and comfortable treatment that feels like a gentle, warm massage.

Meet the rising demand for effective body treatments with the safe, non-surgical solution offered by Sculpt Pro.

TREATMENTS INCLUDE:

Fatty Obesity
Edema-Related Obesity
Muscle Flaccidity
Muscle Spasms
Face Sculpting
Body Contouring
Cellulite Improvement
Stretch Mark Reduction

WHAT CAN YOU EXPECT FROM SCULPT PRO?

- Treat the abdomen, buttocks, or thighs in under 30 minutes.
- Achieve fat burning and body sculpting – reduce the size of the buttocks and thighs, decrease abdominal fat, and firm the body.
- See visible results with just one treatment protocol.
- A genuine non-surgical alternative to liposuction

SCIENTIFICALLY PROVEN RESULTS

During the experiment, strong sound waves effectively promoted tissue metabolism, tightened skin, and enhanced skin elasticity, among other benefits. They can effectively treat stubborn fat deposits and cellulite. By utilizing the cavitation effect of the strong sound waves acting on the fat deposits, these deposits break down, decompose, and are absorbed by the lymphatic system, eventually being expelled from the body.

Fat burning and body shaping -narrow the size of the buttocks and thighs to reduce abdominal fat and body-firming.

Cellulite removal is suitable for all kinds of skin colours to remove undesired fat and cellulite on the skin.

TREATMENT SERIES

Based on clinical data, the initial series consists of 10 treatments, each spaced 5 days apart. A whole-body treatment lasts between 45-60 minutes, while a partial treatment takes about 10 minutes. Typically, noticeable results can be seen in just 4 weeks. However, it's recommended to complete all the treatments.

BEFORE & AFTER

WHY CHOOSE SCULPT PRO?

The 5-in-1 treatment system comprises the ARM, Roller, Face, Body, and Ultrasonic handles. This comprehensive system is designed for wrinkle and fat removal, with multiple handles to cater to different individuals and treatment areas.

It's a multifunctional integrated system that combines infrared light, radio frequency, ultrasound, negative pressure, and mechanical massage. This five-pronged approach effectively targets wrinkles and fat.

The system features a user-friendly operation interface, allowing for customised parameters. This lowers the barrier to operation and broadens the range of potential treatments.

The ultrasonic fat-blasting treatment head enables fat to be expelled from the body non-invasive and painless.

WHAT WILL YOUR PATIENTS EXPERIENCE?

There is zero downtime and no discomfort.

Treatment parameters can be easily adjusted to ensure a comfortable experience.

Expect a gradual smoothing of the skin's surface with a significant cellulite reduction.

Achieve a reduction in the size of the buttocks and thighs, decrease abdominal fat, and firm the body.

Patients report high satisfaction.

Specifications

RF Power	100W
Infrared Light Power	20W
Spectrum	700nm-2000nm
Negative Pressure	0-0.07MPa 0-50mmHg
Ultrasonic Cavitation	40KHz <100W
Power	AC230 V/3A, AC110V/5A, 50/60Hz
Dimensions (l*w*h)	360nm*440nm*900mm
Weight	35Kg
Package Weight	62Kg
Treatment Head Size	Roller: 85nm*55nm
	Body: 65nm*65nm
	Arm: 36mm*36mm
	Face: 25nm*12nm
	Cavitation: 68nm

5 HANDLES IN 1 MACHINE

ROLLER HANDLE: mechanical roller + negative pressure + infrared + 5M radio frequency

ARM HANDLE: Negative pressure + infrared + 5M radio frequency

FACE HANDLE: Negative pressure + 5M radio frequency

BODY HANDLE: Negative pressure + 5M radio frequency

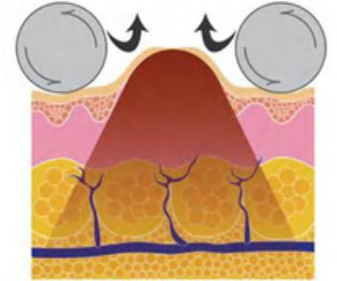

ULTRASONIC HANDLE 40KHz ultra-sonic

Utilising 40KHz ultrasound, the system effectively ruptures the fat cell membranes, breaking down and dissolving the fat cell contents. Combined with lymphatic drainage, this process prevents cellulite or any rebound weight gain after the fat reduction treatment. It effectively targets stubborn fat to achieve genuine weight loss results.

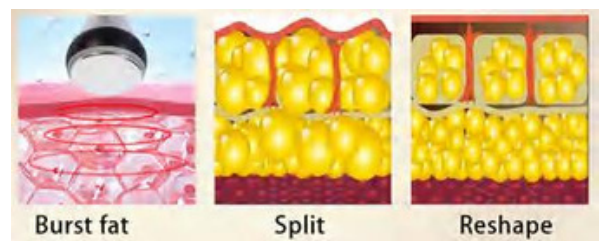

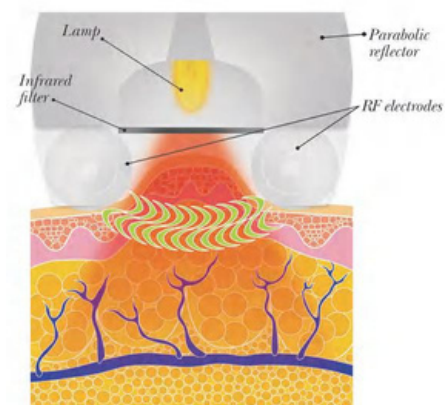

The effect of vacuum negative pressure roller massage can accelerate fat metabolism, promote lymphatic drainage, treat fibrotic honeycombs, and eliminate orange skin fat.

Through negative pressure and mechanical movement, radio frequency penetrates the skin to a 5-15mm depth. This can regenerate collagen and elastic fibres, restoring the skin's radiance.

BIPOLAR RADIO FREQUENCY & INFRARED LIGHT

- Infrared light heats up to the 5mm subcutaneous fat layer.
- RF can penetrate the subcutaneous layer between 5-15mm.
- This process boosts metabolism and breaks down fat.

Our Product range

We offer a wide range of quality cosmetic and aesthetic devices for med spa clinics. For the latest in aesthetic equipment, see our catalog online at www.pepfactor.com

BUNDLE AND SAVE

We have a range of pre-designed bundles available for a reduced price. Not quite what you're looking for? Why not reach out, and we can tailor a package specifically for your clinic.
