PepFactor Skin Rejuvenation

What sets PepFactor Skin apart is its key ingredients: growth peptides and hydrating hyaluronic acid. This formula encourages healthier, younger-looking skin, improves uneven skin tone, reduces pore size, helps smooth wrinkles and so much more. In fact, some women who have undergone PepFactor Skin treatments are so happy with the results that they don't feel the need to apply makeup.

What does it treat?

- ✓ Full face rejuvenation
- ✓ Acne
- ✓ Scarring
- ✓ Skin brightening
- ✓ Fine lines
- ✓ Sagging skin
- ✓ Collagen regeneration
- ✓ Stretch marks
- ✓ Front, side, and back of the neck
- ✓ Décolletage
- ✓ Skin tightening
- ✓ Dark eye circles
- ✓ Back of hands
- ✓ Wrinkly knees

Revolutionary PEPFACTOR

PepFactor can help provide healthier, younger-looking skin with its world-class formula.

How does it work?

PepFactor Skin uses a minimally invasive procedure called microneedling in conjunction with the application of PepFactor serum. Microneedling triggers a natural wound healing response that increases the production and distribution of collagen and elastin.

Initial results can be seen after the first treatment. Lasting and more significant results will occur after 2-8 treatments when spaced 4 to 6 weeks apart.

Benefits of PepFactor
