

What is PEPFACTOR?

PepFactor is an advanced skin and scalp system formulated by doctors and scientists. The key ingredient in PepFactor is the world's first uniquely formulated protein. This natural formulation is bio-identical and works to offer regenerative properties for skin and scalp rejuvenation.

PepFactor exponentially stimulates the synthesis of natural fibroblast in the skin, drastically increasing collagen and elastin, with unsurpassed rejuvenation for both skin and scalp.

World Exclusive PEPFACTOR

HAIR REGROWTH

PepFactor is an advanced scalp and hair treatment system formulated with doctors and scientists. The key ingredient of PepFactor is the world's first and only authentic basic fibroblast growth factor (bFGF). This natural formulation works to offer regenerative properties for hair regrowth.

Universal Medial Aesthetics is the worldwide distributor of the only authentic fibroblast growth factor.

PepFactor may offer clients an alternative to surgery with natural hair regrowth for both men and women.

World Exclusive PEPFACTOR

- Natural hair regrowth
- Effective and affordable
- Non-surgical
- Lasting results
- Quick procedures
- Huge Return on Investment (ROI)
- World's first authentic basic fibroblast growth factor (bFGF)

How does it work?

Hair loss is a common problem that can leave many feeling self-conscious. PepFactor promotes natural hair regrowth by stimulating collagen and encouraging the tissue growth and healing of both skin, scalp, and hair follicles. PepFactor ingredients have been shown to help slow down hair loss and regrow hair.

Growth factors are involved in the regulation of hair morphogenesis and cycle hair growth.

BENEFITS

PepFactor naturally stimulates your body's own collagen, which in-turn improves hair and scalp health and assists with the regeneration of hair.

You can expect to see improvements after a couple of weeks from your first PepFactor treatment. Once you have had 3-4 treatments, you will experience the full results. Results can vary from person to person.

Administering PepFactor

1. Cleanse the treatment area.
2. Perform a microneedling procedure to create micro-channels that allow more effective penetration of PepFactor into the scalp.
3. Apply PepFactor and infuse.
4. Perform LED treatment.

Your body will naturally accept PepFactor because it contains a super-concentration of authentic growth factor and copper peptide. Pepfactor is available for all skin types.
